

# NANO TECH: THE ULTIMATE MOSQUITO SOLUTION

## Mode of Action

Trillions of organic sourced nano particles, smaller than three nano, penetrate and dissolve the lipid protective envelope surrounding and protecting the mosquitos' cellular structure. The cell disintegrates. The mosquito has NO defense.

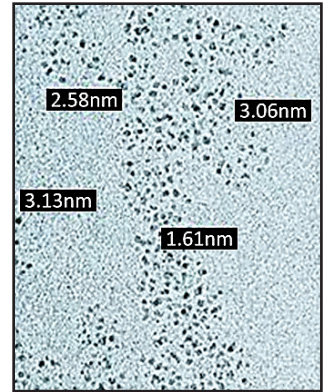

**Important: Nano particles do NOT attack the nervous systems of insects, people or pets**

**“Harmless to Humans & Animals”**

The ingredients were clinically documented as **Genotoxicity Free.**

*Per internet searches, no other pesticide achieved this health and safety standard.*

**Observed harmless to Honey Bees & Lady Bugs**

Adult mosquitos die immediately upon contact. Larvae: 99% die within 24 hours.  
The surviving 1% have no wings.

**Mode of Action:** A Dutchman demonstrated the penetration using red dye to penetrate tulip bulbs. See below.

Before adding red dye

No penetration

15 minutes after adding Purely Green, the dye penetrated 100%

**NOTE:** Nano particles serve as a broad spectrum bio-pesticide that has killed every gram negative insect observed treated.

It is available as **Purely Green Mosquito Control** and **Purely Green Bio-Pesticide.**

**Conclusions:** Protect your family, employees and pets.

**Farmers:** Protect your crops, family, employees & animals.

Replace those toxic mosquito and other pesticides with more effective, less expensive & safer food. Toxic pesticide residue free.
